

Dear Dr. Davidson and Ms. Schmidt,

Please accept this resubmission of my manuscript, "Numerical modeling of hohlraum radiation conditions..." by Cohen, Landen, & MacFarlane, PoP: MS #POP28745(a).

We have made further modifications to the manuscript based on the referee's follow-up report (received on July 26, 2005; after our initial resubmission following the first referee's report).

We think that the manuscript is now ready for publication but we are open to making further changes if either you or the referee has specific suggestions.

Two small technical points: (1) Although the captions are in proper order in the LaTeX file, they come out slightly out of order and somewhat strangely formatted in the resultant dvi and ps files (we've encountered this issue before and I don't think it should be a problem for you, but I thought I'd mention it); and (2) Ref. [7] is "in press" (at JQSRT); it should appear soon. If you check with me at the last possible copy-editing phase, we may have the full reference available. My "in press" formatting in the reference list also may not have been done correctly (as it's boldfaced and there's a hanging "p." without a page number after it).

We have filed a copyright form for this paper already, and are awaiting word of the page charges before we file the appropriate paperwork for that.

Thank you,
David Cohen
